Lab Indonesia

Show Update Is Out!

Here's our e-Show Update for LabIndonesia!

With over 220 exhibitors and 9000 visitors recorded in the previous edition, Lab Indonesia is, and remains the only strategic avenue for showcasing laboratory technology and business meetings in Indonesia.

Despite declining global economic trends, Indonesia remains the prime destination for foreign investors to invest in the ASEAN region. A total of USD7.3 billion was recorded in the first quarter of this year, with investment focus on mining, base metals, and property.

In this second edition of our E-Show Update, we are pleased to announce the participation of several new exhibitors participating in Lab Indonesia. Among them are global brands such as Mettler Toledo, which specializes in laboratory precision measuring and weighing, and FEI, a subsidiary of ThermoFisher and specialising in nanotechnology and TEM.

Also find out about the latest progress of LabIndonesia's many roadshows for the past few months! From Medan to Bali, the LabIndonesia team has been reaching out to leading academic and scientific institutions across Indonesia.

Stay up-to-date with LabIndonesia's latest progress in our ongoing E-Newsletters, and the upcoming Show Preview!

- Advertising Opportunities in Website, e-newsletter, Show Preview, Show Directory and all advertising channels.
- Sponsorship Opportunities to maximize visibility to at all time to the industry players.
- Show Preview Product Highlights to excite potential buyers with your interesting products.
- Roadshows to meet buyers in Jakarta and beyond.
- Seminar and Workshop Sessions to interact with the target buyers in a close up setting.
- Special Invitation to be sent to the guests, on behalf of exhibitors.

INDOFA UTAMA MULTI CORE, PT

Dynamic climate chambers for small-scale tests. BINDER GmbH, has added a new model designed specifically for small-scale tests to the units in its MK and MKF series. April will see the launch of the MK 56 and MKF 56 dynamic climate chambers with an interior volume of 60 liters. "This new size is also ideal for small testing laboratories that do not have much available space or that only perform limited tests without using their unit to full capacity on a regular basis." The MK series is designed for heat and cold test cycles ranging from -40°C to 180°C, while the MKF series is additionally equipped with a humidifying system. This makes it suitable for complex dynamic climate profiles in dynamic conditions with humidity values ranging from 10% to 98% relative humidity. The units come with a new BINDER touch screen controller, making them simple and intuitive to operate. Both units have heated viewing windows with interior LED chamber lighting and a dewing protection system.

LabIndonesia

Meets Potential Buyers at Roadshows

Being Indonesia's sole platform for laboratory technology, LabIndonesia constantly strives to bring the perfect match of instrument buyers, investors, and equipment manufacturers all under one event.

To ensure LabIndonesia brings in quality visitors in the 2018 edition, the organiser launched a roadshow campaign to raise awareness and engage with quality buyers from government agencies, leading scientific associations, and academic institutions in Indonesia.

The roadshows, which started off in August 2016, covered major cities such as Bali, Balikpapan, Bandung, Banjar, Bogor, Makassar, Medan, Palembang, Purwokerto, Tangerang, Surabaya and Yogyakarta. The event was well received by the participants.

We have attached our roadshow journal to share with our updates, and please stay in touch with us for the latest update on our upcoming roadshows.
